

IRONBALL

Pure tube tone in a compact body

IRONBALL

Pure tube tone in a compact body

There's a new kid in town and it's a tough one with a mind-blowing attitude: The new ENGL E 606 Ironball. This 20-watt, all tube head made in Germany is designed to fulfill the needs of classic clean to modern metal players who demand sonic versatility and useful features in a handy, small-size format. The Ironball delivers warm and rich clean sounds plus organic crunch sounds. The rhythm tones are chunky and the leads are fat and juicy, totally unexpected from an amp this size.

Listen for yourself: **The ENGL IRONBALL**

FEATURES AT A GLANCE:

- 20 watts, all tube head (2 x EL 84 power amp tubes & 4 x ECC 83 preamp tubes)
- 2 channels sharing one EQ (Bass, Middle, Treble) plus Presence
- Gain Boost & Gain Control for each channel
- Extra Volume Control for the Rhythm/Lead Channel
- Master Volume Control
- Master Volume Boost (MVB) with fixed setting for a second Master Volume
- Power Soak (20W, 5W, 1W, Speaker Off)
- Headphone Out
- Frequency Compensated Out
- Serial FX Loop (Send & Return)
- Reverb Control
- Speaker Out 8 Ohm, 16 Ohm
- 2 x Z4 Footswitch input jacks to control the Ironball
