

Before using this unit, carefully read "USING THE UNIT SAFELY" and "IMPORTANT NOTES" (leaflet "USING THE UNIT SAFELY"). After reading, keep the document(s) where it will be available for immediate reference.

Main features

High-impedance volume pedal is optimal for connecting directly to electric guitars and electric basses.

Connecting your equipment

* To prevent malfunction and equipment failure, always turn down the volume, and turn off all the units before making any connections.

* When you operate the unit, please be careful not to get your fingers pinched between the movable part and the panel. In places where small children are present, make sure that an adult provides supervision and guidance.

How to use the tuner out

Connect the output of a guitar to INPUT jack on the FV-30H. Connect a tuner to the TUNER OUT jack.

If you return the pedal to the minimum position, you can now tune the instrument without any sound from the amp.

Main specifications

BOSS FV-30H: Foot volume

Dimensions	80 (W) x 192 (D) x 58 (H) mm
	3-3/16 (W) x 7-9/16 (D) x 2-5/16 (H) inches (Maximum height)
