

Before using this unit, carefully read "USING THE UNIT SAFELY" and "IMPORTANT NOTES" (leaflet "USING THE UNIT SAFELY"). After reading, keep the document(s) where it will be available for immediate reference.

Main features

Low-impedance stereo volume pedal is perfect for connecting to effects processor outputs, keyboards, and other devices with low-impedance output.

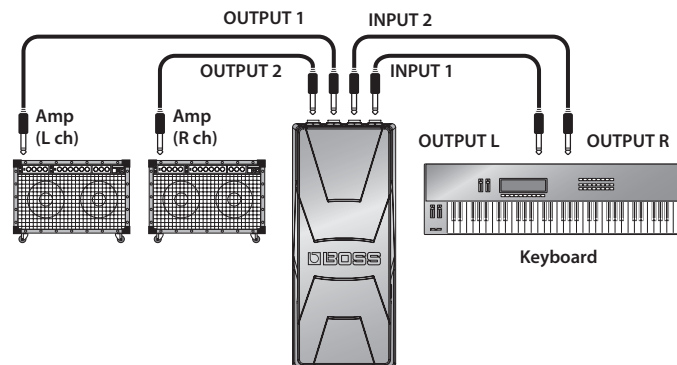

Connecting your equipment

Setup with a guitar

- * Because the FV-30L is designed low-impedance, it should be set up with a guitar as shown in the figure; after an effect unit.
- * To prevent malfunction and equipment failure, always turn down the volume, and turn off all the units before making any connections.
- * When you operate the unit, please be careful not to get your fingers pinched between the movable part and the panel. In places where small children are present, make sure that an adult provides supervision and guidance.

Setup for stereo output

Main specifications

BOSS FV-30L: Foot volume
