Alpha·Omega Super Intelligent Footswitch

Alpha·Omega Super Intelligent Footswitch has three programmable footswitches for assigning channels (Clean, Alpha, Omega, Mod) and compressor state (On or Off). It also has a separate mute footswitch. The channel footswitch functions are programmed through Darkglass Suite, and settings are stored on the Alpha·Omega 900 amplifier.

Alpha·Omega Super Intelligent Footswitch is compatible with all Darkglass amplifiers. When connected to Microtubes amplifiers, the footswitch functions cannot be programmed. Also, Super Intelligent Footswitch for Microtubes 900 is fully compatible with Alpha·Omega 900, including the programmability.

Controls

The default settings of the Alpha·Omega Super Intelligent Footswitch are the following:
A: Clean, compression Off.
B: Clean, compression On.
C: Distortion (Mod), compression On.
Mute: Mutes the amplifier for tuning or other purposes.

Commercial information

SRP: €109 (20,7% estimated VAT included).
EAN Code: 6430054580458
SKU: AOSIFS
Packed Size: 243*62*56 mm / **Packed Weight:** 0,610 kg
