Spark PEDAL

Portable Smart Amp & Effects Pedal
with Built-In Looper

**YOUR RIG. ONE PEDAL.
ZERO COMPROMISES.**

Spark PEDAL puts an entire stadium-ready rig, a smart effects processor, and a looper right at your feet. No menus. No complex routing. Just legendary tone, anywhere you plug in.. Amps, effects, a built-in looper, and full Spark app access for electric, acoustic & bass guitars, all in one simple-to-use pedal. Same tone, wherever you take it. **The rig follows you now.**

Five knobs. Three switches. No menus.

Forget scrolling through screens to find your sound. Spark PEDAL gives you everything you need on the top panel.

Amp Mode

Select your amp with the main knob. Dial in gain, bass, mid, and treble with the surrounding knobs. Shape your tone in real time, the way you want it.

FX Mode

Press the main knob to switch modes. Now those same knobs control drive, mod, delay, and reverb. Turn within a selected effect to adjust its level.

6 onboard presets across 2 banks

Save your favorite sounds and switch between them on the fly. Six slots, two banks, one tap to recall.

Built-in tuner

A full-featured tuner is built right in — no extra pedal, no extra cables, no compromise.

Dynamic LED feedback

Color-coded LEDs around the switches and main knob show what's active at a glance. Mode, preset, looper status, battery level — read it all without breaking your flow.

Looper: Build it, layer it, jam over it.

The built-in 60-second looper turns Spark PEDAL into a full performance and writing tool. Lay down a base layer, stack overdubs, undo and redo without lifting your hands from the guitar. Whether you're sketching a song idea or filling a room solo, the looper is right there waiting.

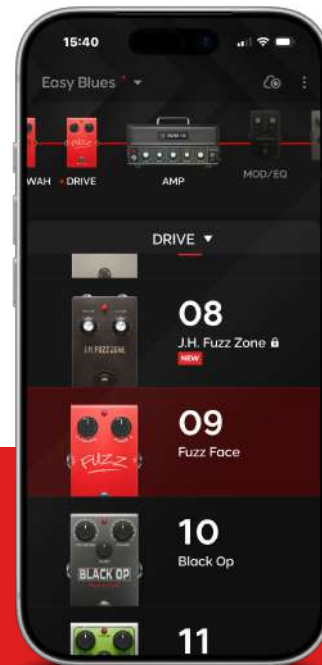

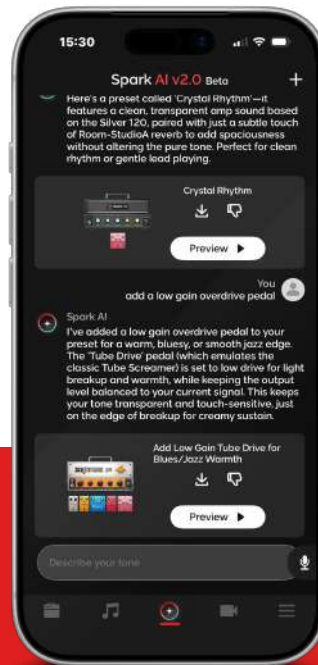

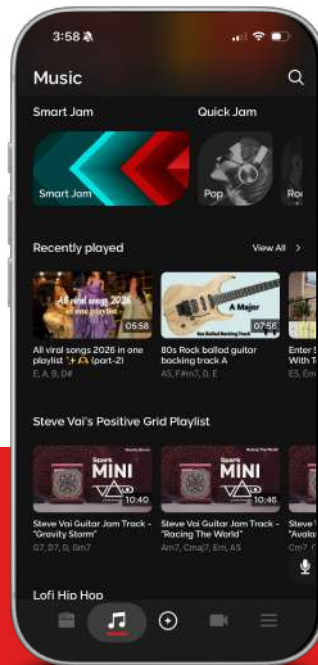

- Record, overdub, play, stop, undo, and clear — all hands-free
- 60 seconds of loop time per layer
- Dedicated switches mean no menu hunting mid-loop

The Full Spark Experience.

Spark PEDALis fully compatible with the Spark app.

- All gear included—33 amps, 43 effects and 150,000+ custom tones on ToneCloud
- Spark AI—create custom tone with prompts
- Auto chords - find the chords to your favorite songs
- And more!

Wherever You Need It To Be.

Spark PEDAL fits into any setup whether you're at home, on stage, or in the studio.

- 1/4" instrument input for electric, acoustic, or bass
- 1/8" stereo headphone out
- 1/4" L/Mono + R line outputs for PA use
- 1/8" MIDI in/out for preset switching or syncing
- 1/4" TRS expression pedal input
- USB-C for charging, firmware updates, and audio interface connection

Plug into anything.

- At home — headphones in, late night, no amp needed
- Home studio — on your desk plugged into your computer using the built in interface
- Band rehearsal — running through any amp, PA, or Spark CAB (yes you can also turn off the cab sim)
- Small gig / open mic — straight into the PA, easy
- Church — clean, reliable tone, minimal setup
- On the road — in a hotel room, backstage, anywhere with a guitar
- In your pedalboard — add its effects and gear to any setup
- In your existing rig — slot it into your current setup, alongside other gear, and bring your Spark sound with you

Spark PEDAL is ready to play.

Spark PEDAL

Your rig. One pedal.
Zero compromise.
